

CEZAMAT – unique high-tech institution in R&D landscape in Poland

Romuald B. BECK
CEZAMAT, Poland

Centre for Advanced Materials and Technologies – CEZAMAT is a new R&D institution that aims at focusing on high-tech, interdisciplinary applied oriented research. Having gathered nine scientific institutions within the Consortium, it can carry on R&D works in various fields covering, among others: photonics, electronics, physics, chemistry, material science and bio-engineering in state-of-the-art laboratories. Managed in company like way, with special attention to repeatability and reliability, targeted on developing ideas to the highest possible level of Technology Readiness Level (TRL) CEZAMAT remains wide open for potential collaborations with research institutions and industry.

Long abstract not available at the date of final printing.
